TAGPU – UV-stabilised Tiptags

TAGPU LOOP is a specially designed cable marker for identifying wires and cables without using a cable tie. The markers are looped on cables and wires from 2.8 mm to 35 mm, where a permanently legible and UV resistant marking is required. The cable markers consist of a robust and flexible polyurethane material and are especially suited for harsh environments. The material has been conditioned for printing on both thermal transfer and laser beam printers. Simply print and press out the required TAGPU and apply with cable ties.

Print with HellermannTyton's premium range of thermal printers and ribbons or a laser beam marking device.
